items		
	Our meeting took place on 15.12.2017 at ULg facility in Arlon. Thanks to our hosts! 10 partners were present (see participants list)	
Meeting Powerpoint	See attached PowerPoint	
Project progress and existential questions	We had a wide discussion about partners' expectations.... As usual in this kind of project (after 12 months...) , a few partners forget that they will find what they bring in the project and that their expectations should be at the level of their initiatives. Actually, there ain't too much initiatives or, at least, a lack of communication about sub-groups initiatives. Do not expect the lead participant to be the unique initiator and/or expert.	
Supporting tools	There was a sterile discussion on the tools used to support the program. We will not change tools (blog) because some participants cannot automate information flows. They better invest time to make it work!	
Media & com'	<p><u>The website is still incomplete.</u></p> <ul style="list-style-type: none"> • UNILUX datasheet is empty. • Each partner should have a trilingual card <p style="color: red;">→ to be done ASAP : each partner send to Elise Bernard (Henallux) his/her card at least in native language and English</p> <p><u>Meetings and seminars:</u> We have to organize public seminars in each country to present our project & to prepare targets recruitment. We have confirmed 3 seminars</p> <ul style="list-style-type: none"> • 1 in Lorraine • 1 in Luxembourg/Wallonia • 1 in Saarland <p>Discussion was about the choice of the dates..... and is still open:</p> <ul style="list-style-type: none"> → In June? → In summer? → In September/October? 	

	<p>Due to the fact</p> <ul style="list-style-type: none"> → that many partners failed → and that it depends from internal authorizations for each partner <p>the question is still open.</p> <p>So there 3 subgroups to be working on this issue</p> <p>① Wallonia and Luxembourg: ULg, IDeluxHennallux, I-Mage, DroneLab, Unilux, List Leader: IDELUX</p> <p>② Saarland: IZFP & Coptersystems Leader: IZFP</p> <p>③ Lorraine: INNO8, Loria, CentraleSupelec, Alerion Leader: INNO8</p> <p>➔ To be done: Each leader has to organize its working subgroup ASAP</p> <p><u>GRoNe challenge</u></p> <p>As you know, we decided last year to organize a GR challenge in Luxembourg at the end of spring.</p> <p>Don't look back about the flop and fortunately, UNILUX managed to organize a nice a nice summer school in September 2017</p> <ul style="list-style-type: none"> → The remaining question is : do we try again ? → Co-leader are UNILUX and LORIA <p>➔ To be done: co-leaders (Holger, Laurent) have to propose something to the consortium ASAP</p>
R&D	<p>There are 2 sub-groups: mining after-care and environment</p> <p>The lack of communication is here.</p> <ul style="list-style-type: none"> → We have heard that environment subgroup has worked between Luxembourg and Arlon. Project needs to have French and german partners involved or, at least, informed, so they can decided to go further or not → Mining subgroups has organized a 1st visit in Saarland limestone quarries – thanks to Bergamt and IZFP. Next step is a work meeting in INERIS facility with those who have been attending BERGAMT visit → IZFP and BRONELAB have to work about a LIDAR dedicated electronic circuit board. Next meeting will be in Nancy <p>➔ To be done: leaders have to create dedicated notes on the weblog to explain what is to be done to the other partners</p>

Next meeting: Support committee meeting at the end of March 2018
(look for the dedicated Doodle)
